Western Copper and Gold Corporation

Notes to the Condensed Interim Consolidated Financial Statements

As at and for the three and six months ended June 30, 2022

(unaudited – prepared by management)

(Expressed in Canadian dollars)

1. NATURE OF OPERATIONS

Western Copper and Gold Corporation (together with its subsidiaries, "Western" or the "Company") is an exploration stage company that is directly engaged in exploration and development of the Casino mineral property located in Yukon, Canada (the "Casino Project").

The Company is incorporated in British Columbia, Canada. Its head office is located at 1200 – 1166 Alberni Street, Vancouver, British Columbia.

The Company will need to raise additional funds to complete the development of the Casino Project. While Western has been successful in raising sufficient capital to fund its operations in the past, there can be no assurance that it will be able to do so in the future.

2. BASIS OF PRESENTATION

a. Statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS"), applicable to the preparation of interim financial statements, including International Accounting Standard 34 - Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the Company's annual consolidated financial statements for the year ended December 31, 2021, which have been prepared in accordance with IFRS

These financial statements were approved for issue by the Company's board of directors on August 4, 2022.

b. Accounting estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to exercise judgement in the process of applying its accounting policies and to make estimates that affect the reported amounts of assets and liabilities and disclosures of contingent assets and contingent liabilities at the date of the financial statements and the reported amounts of income and expenses during the period. Actual results could differ from those estimates. Differences may be material.

Judgment is required in assessing whether certain factors would be considered an indicator of impairment for the exploration and evaluation assets. We consider both internal and external information to determine whether there is an indicator of impairment present and accordingly, whether impairment testing is required. Where an impairment test is required, calculating the estimated recoverable amount of the cash generating units for non-current asset impairment tests requires management to make estimates and assumptions with respect to estimated recoverable reserves or resources, estimated future commodity prices, expected future operating and capital costs, and discount rates. Changes in any of the assumptions or estimates used in determining the recoverable amount could impact the impairment analysis. Management did not identify any impairment indicators during the three months ended June 30, 2022.

6. FLOW THROUGH PREMIUM LIABILITY

The flow-through premium liability balance as at June 30, 2022 of \$252,194. (December 31, 2021 – \$759,525) arose in connection with the flow-through share offering the Company completed on July 29, 2021. The reported amount is the remaining balance of the premium from issuing the flow-through shares. The flow-through premium is recognized in the statement of loss based on the amount of qualifying flow-through expenditures incurred by the Company.

The Company is committed to incurring on or before December 31, 2022 qualifying Canadian exploration expenses as defined under the Income Tax Act, Canada ("Qualifying CEE") in the amount of \$8,010,000 with respect to the flow-through share financing completed on July 29, 2021. None of the Qualifying CEE will be available to the Company for future deduction from taxable income.

As at June 30, 2022, the Company had incurred \$6,789,706 of Qualifying CEE of the total amount committed. As at June 30, 2022, the Company had a remaining commitment to incur Qualifying CEE of \$1,220,294. The Company recognized a flow-through premium recovery of \$399,323 and \$507,331 for the three and six months ended June 30, 2022, respectively (six months ended June 30, 2021 - \$1,408).

7. SHARE CAPITAL

a. Authorized share capital

The Company is authorized to issue an unlimited number of common shares without par value and an unlimited number of preferred shares without par value.

b. Financing

On July 29, 2021, Western completed a brokered private placement of flow-through common shares (the "FT Shares"). The Company issued a total of 2,670,000 FT Shares at a price of \$3.00 per FT Share for aggregate gross proceeds of \$8,010,000. Issuance costs related to the private placement totaled \$694,788. A flow through premium liability of \$1,655,400 was recognized. Refer note 6.

On May 31, 2021, Rio Tinto Canada Inc. ("Rio Tinto") completed a strategic investment in Western by way of a private placement of the Company's common shares. The Company sold 11,808,490 common shares at a price of \$2.17 per common share for gross proceeds of \$25,624,423. The Company incurred \$865,829 in costs associated with the private placement.

11. SEGMENTED INFORMATION

The Company's operations are in one segment: the acquisition, exploration, and future development of mineral resource properties. All interest income is earned in Canada and all assets are held in Canada.

12. CAPITAL MANAGEMENT

The Company considers capital to be equity attributable to common shareholders, composed of share capital, contributed surplus, and deficit. It is the Company's objective to safeguard its ability to continue as a going concern so that it can continue to explore and develop mineral resource properties.

The Company monitors its cash position on a regular basis to determine whether sufficient funds are available to meet its short-term and long-term corporate objectives, and makes adjustments to its plans for changes in economic conditions, capital markets and the risk characteristics of the underlying assets.

To maintain its objectives, the Company may attempt to issue new shares, seek debt financing, acquire or dispose of assets or change the timing of its planned exploration and development projects. There is no assurance that these initiatives will be successful.

There was no change in the Company's approach to capital management during the year. Western has no debt and does not pay dividends. The Company is not subject to any externally imposed capital restrictions.

13. FINANCIAL INSTRUMENT RISK

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company has exposure to liquidity, credit, and market risk from the use of financial instruments. Financial instruments consist of cash and cash equivalents, short-term investments, marketable securities, certain other assets, and accounts payable and accrued liabilities.

a. Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they come due. The Company uses cash forecasts to ensure that there is sufficient cash on hand to meet short-term business requirements. Cash is invested in highly liquid investments which are available to discharge obligations when they come due. The Company does not maintain a line of credit.

b. Credit risk

Financial instruments that potentially subject the Company to credit risk consist primarily of cash and cash equivalents and short-term investments. These financial instruments are at risk to the extent that the institutions issuing or holding them cannot redeem amounts when they are due or requested. To limit its credit risk, the Company uses a restrictive investment policy. Cash and cash equivalents and short-term investments are in Canadian chartered banks. The carrying amount of financial assets recorded in the financial statements represents Western's maximum exposure to credit risk.

c. Market risk

The Company is exposed to market risk because of the fluctuating values of its publicly traded marketable securities. The Company has no control over these fluctuations and does not hedge its investments. Marketable securities are adjusted to fair value at each balance sheet date.

As at June 30, 2022, the carrying amounts of cash and cash equivalents, short-term investments, certain other assets, and accounts payable and accrued liabilities are considered to be reasonable approximations of their fair values due to the short-term nature of these instruments. The fair value of the marketable securities is determined by reference to published price quotations in an active market (classified as level 1 in the fair value hierarchy).
